The Fire/Rescue-29 is the latest introduction for the MetalCraft Marine line of high speed fire/rescue boats. The FR-29 concept is all about rapid response and lower crew demands, on a versatile trailerable Fire Rescue platform. Its twin 150 HP outboards power the boat to 40-45 MPH subject to loading and 45-50 MPH with twin 200's. Its dual port & starboard dive doors with integral ladders, vastly improve dive operations and can handle more divers with separate ingress/egress than other boats. The boat has a high metacentric height providing great stability for rescue or dive missions. The twin 2-1/2" handlines can be wye'd to provide an LDH landline from the 575 pump arrangement or the optional 1500 GPM pump package comes with a 4 or 5" LDH Storz connection. The FR-29 is fast responsive and safe with 5 X watertight compartments and level flotation provided by full perimeter 8" fenders equal to NFPA Class 'A' fireboats. The aluminum 'T' top fully encloses to protect crew and can be used as an optional search tower, it also carries a full aft deck sun canopy. Simplicity is the key to this boat with easy maintenance and repairability. The FR-29 comes with MetalCraft's standard 10 year hull warranty and is fireman tough. This boat packs a huge punch for its small size and can be beached or get into the smallest of marinas. Ask a MetalCraft representative about our large list of options.
